TESTIMONIALS

"I'd like to particularly highlight during month end submission, their support was much appreciated whereby they stay back with us till late night/next morning to quickly resolve and manage the submission"

HEAD OF REGULATORY REPORTING
FINANCIAL INSTITUTIONS

"Their proactive approach and meticulous attention to detail made a lot of difference, ensuring that final submission has been completed successfully."

HEAD OF CREDIT RISK
FINANCIAL INSTITUTIONS

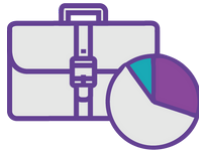

REGULATORY & SUPERVISORY REPORTING SOLUTION

A full-fledged data transformation technology with workflow centric application to support RE data preparation and submission to regulatory bodies.

REGULATORY COMPLIANCE

Adherence to regulatory standards. Ensure accuracy, reliability, timely, and quality data submission.

OPERATIONAL EFFICIENCY

Automates data transformation processes. Reduces manual effort and accelerate data processing time.

FLEXIBILITY & SCALABILITY

Accommodates RE's data volumes of all sizes, from large-scale to small-scale.

UNIVERSO[®]

FRONT END INTERFACE

Multi-user workflow application for direct data entry, data checking and approval, handling error rejection, and viewing reports.

REPORTING & ANALYTIC

Extensive multi dimension reports for data insights, reconciliation, and data-driven approach to provide a comprehensive analysis for management purposes.

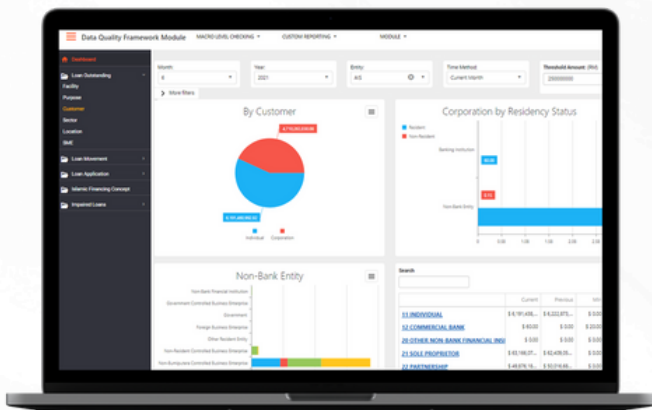

TRACEABILITY & GOVERNANCE

Comprehensive documentation for analysis and specification phases, support full rules and mapping traceability from source to final output.

FUNCTIONAL SCENARIO

CCRIS SUBMISSION

- Extract, convert, amend, validate, and monitor your submission data.
- Customizable to match reporting entities' input and output format preferences.
- Supports both on-premises and cloud services for versatile deployment options.

DATA QUALITY FRAMEWORK

- Historical end-to-end data quality management, from data profiling to monitoring and reporting.
- It helps to ensure that your data complies with industry standards and regulations.
- Improved decision making - high quality data leads to better business decisions.

PIDM SUBMISSION

- Help Deposit-Taking Members (DTMs) to submit necessary information to PIDM in standardized requirements.
- To ensure full compliance with PIDM regulations.
- Suitable for banks of all sizes, from small community banks to large financial institutions.

CAN BE EXTENDED

- Configure custom workflows that align with the unique operational needs of various reporting entities
- Common reporting platform ready to match reporting entities' input and output (xml, csv, json, etc)

INTELLIGENT GATEWAY SOLUTION FOR EXTERNAL INFORMATION PULL

A comprehensive platform to assist Reporting Entities (RE) of any size in automating and managing their credit application processes, featuring real-time data retrieval and credit health assessments.

Expedite the Credit Application Process with a straight through process

- Eliminates manual steps
- Reduces processing times
- Delivers instant accurate credit reports within seconds

Provides a front-end interface for

- Direct data entry
- Data checking and approval
- Handle error rejections
- View reports

Credit Report

Retrievals of credit reports for credit decisioning.

Application Submission

Reporting of new and updated status of credit application.

Seamless Integration

With LOS, 3rd party solutions, credit bureaus, rating agencies, SSM, bankruptcy etc.

Rule-based decisioning

Enhanced credit evaluation through dynamic, rule-based scorecard customization.

ENHANCES DATA INTEGRITY & TRANSPARENCY

Provides real-time credit data retrieval from various Credit Rating Agencies (CRAs)

ADDITIONAL SOLUTIONS

Trisilco partners with leading technology providers to empower BFSI institutions to streamline their lending processes, accurately assess credit risk, and ensure compliance with AML regulations.

Anti-Money Laundering Solution

Ensuring AML compliance for BFSI Institutions

Credit Risk Rating

Manage your credit risk assessment and credit approval

Credit Decisioning Platform

Automating credit origination and decisioning processes

Loan Origination System

Facilitates the entire loan origination process

Financial Spreading Solution

Automated statement spreading and analysis

e-KYC Solution

Designed to detect and prevent fraudulent activities
